GP JOULE CONNECT launches English website

Website and webshop for charging stations now also available for international customers

Reußenköge, 16 December 2024

GP JOULE CONNECT goes international: The project developer for charging infrastructure at GP JOULE has launched its website and webshop in English. This enables English-speaking and international customers to access an overview of GP JOULE CONNECT's products and services quickly and easily.

"We are delighted to now offer our website in English," says Manuel Reich, Managing Director of GP JOULE CONNECT: "This allows us to expand our reach in the international market and appeal to customers outside Germany. This is a key competitive advantage in today's world."

The entire GP JOULE CONNECT website and webshop, through which customers can obtain their charging infrastructure and accessories, are now available in both German and English. The product range includes solutions and project examples for fleets, electric lorries and buses, charging parks, retail, real estate, municipal utilities, energy suppliers, and petrol stations.

Supercharging your business

"We operate in an international arena and feel very comfortable there. Our slogan 'supercharging your business' has already paved the way," says Manuel Reich: "Therefore, it was only logical for us to present our offerings in English as swiftly as possible."

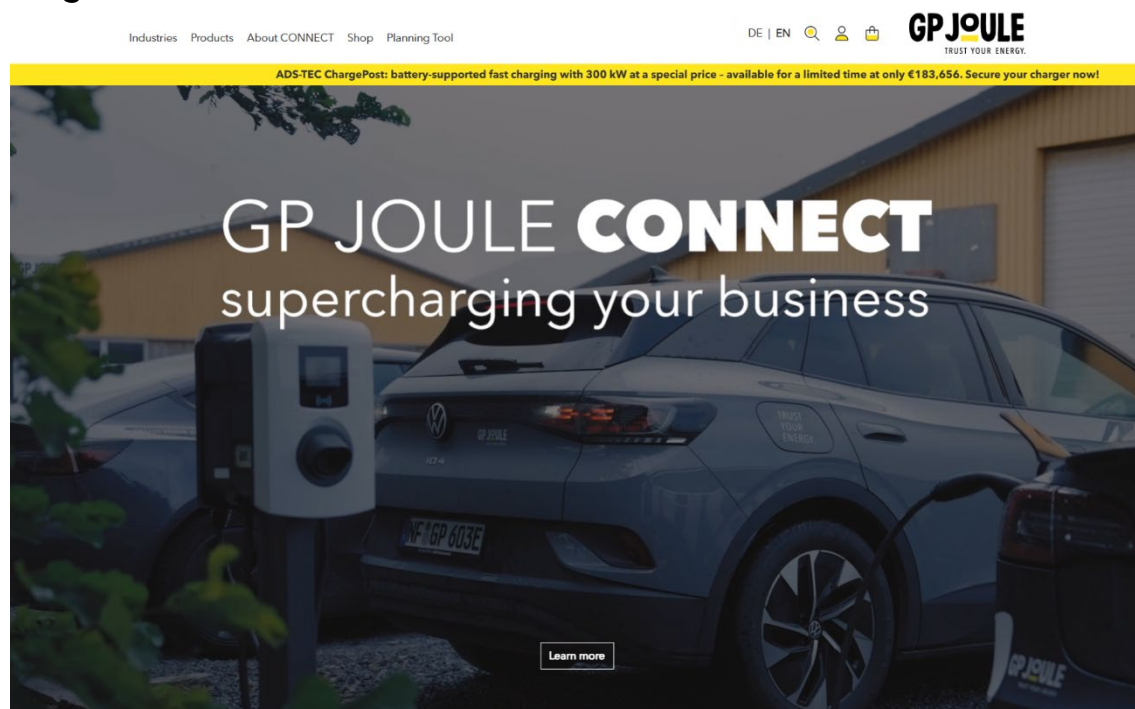

The company welcomes website visitors with a revamped homepage featuring a large-scale video showing GP JOULE's own e-mobility at its headquarters in Reußenköge.

The English website is now available at <https://www.connect-gp-joule.de/en/> for everyone to access. But why not visit us in person!

GP JOULE at the E-world in Essen

From **11 to 13 February 2025**, the experts in charging infrastructure and e-mobility from GP JOULE CONNECT will be at E-world energy & water in Essen at **Stand C114 in Hall 2**.

About GP JOULE

GP JOULE is an integrated energy supplier that covers the entire energy value chain, from generation to use - and from consulting and financing through to project planning, construction and service. GP JOULE produces and sells wind and solar power, green hydrogen and heat and makes use of it where it is most effective: in electric and hydrogen-based mobility, in households and in industry. From its base in Germany, GP JOULE has been shaping the future of energy in Europe since 2009. For a secure, independent and sustainable supply of energy. For 100% renewable energy for everyone.

GP JOULE won the 2022 German Mobility Award for its eFarm hydrogen mobility project.
